

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-K

(Mark One)

☒ ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended December 31, 2024
or

☐ TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

Commission file number: 0-27275

Akamai Technologies, Inc.

(Exact name of registrant as specified in its charter)

Delaware
(State or other jurisdiction of incorporation or organization)

04-3432319
(I.R.S. Employer Identification No.)

145 Broadway
Cambridge, Massachusetts 02142
(Address of principle executive offices) (Zip Code)

Registrant's telephone number, including area code: (617) 444-3000

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Trading Symbol(s)	Name of each exchange on which registered
Common Stock - par value \$0.01 per share	AKAM	Nasdaq Global Select Market

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes ☐ No ☒

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Act. Yes ☐ No ☒

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☐ No ☒

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes ☐ No ☒

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer ☒ Accelerated filer ☐ Non-accelerated filer ☐ Smaller reporting company ☐ Emerging growth company ☐

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act. ☐

relationships in the industry than we do. This is particularly true with respect to our compute solutions, as a small number of very large competitors have established themselves as leaders in the compute business. As a result, some competitors have in the past and may in the future be able to: develop superior products or services; leverage better name recognition, particularly in the security and compute markets; enter new markets more easily or better manage the impact of changes in general economic conditions, geopolitical conditions and industry pressures; gain greater market acceptance for their products and services; enter into long-term contracts with our potential customers; increase their points of presence and proximity to enterprise data centers and end users faster than us; expand their offerings more efficiently and more rapidly; bundle their products that are competitive with ours with other solutions they offer in a way that makes our offerings less appealing to, or more costly for, current and potential customers; more quickly adapt to new or emerging technologies and changes in customer requirements; take advantage of acquisition, investment and other opportunities more readily; offer lower prices than ours, including at levels that may not be profitable for us to match; spend more money on the promotion, marketing and sales of their products and services; offer higher salaries to talented professionals which may impact our ability to hire or retain engineering and other personnel; and implement shorter sales cycles with customers and prospects.

Smaller and more nimble competitors may be able to: attract customers by offering less sophisticated versions of products and services than we provide at lower prices than those we charge; develop new business models that are disruptive to us; and respond more quickly than we can to new or emerging technologies, changes in customer requirements and market and industry developments, resulting in superior offerings.

Ultimately, any type of increased competition could result in price and revenue reductions, loss of customers and loss of market share or inability to penetrate new markets, each of which could materially impact our business, profitability, financial condition, results of operations and cash flows.

We and other companies that compete in this industry and these markets experience continually shifting business relationships, reputations, commercial focuses and business priorities, all of which occur in reaction to industry and market forces and the emergence of new opportunities. These shifts have led or could lead to our customers or partners becoming our competitors; customers implementing multi-vendor policies and seeking out one or more of our competitors to provide content and application delivery or security protection services; network suppliers no longer seeking to work with us; and technology companies that previously did not appear to show interest in the markets we seek to address entering into those markets as our competitors. With this constantly changing environment, we may face operational difficulties in adjusting to the changes or our core strategies could become obsolete. Any of these or other developments could harm our business.

Defects or disruptions in our products and IT systems could require us to increase spending on upgrading systems, diminish demand for our solutions or subject us to substantial liability.

Our solutions are highly complex and are designed to be deployed in and across numerous large and complex networks that we do not control. From time to time, we have needed to correct errors and defects in the proprietary and open-source software that underlies our platform that have given rise to service incidents, outages and disruptions or otherwise impacted our operations. We have in the past and could in the future face the loss of customers from these incidents as they seek alternative or supplemental providers. We have also periodically experienced customer dissatisfaction with the quality of some of our delivery, security, compute and other services, which has led to a loss of business and could lead to a loss of customers in the future. Furthermore, most of our customer agreements contain service level commitments. If we fail to meet these contractual commitments, we could be obligated to provide credits for future service, or face contract termination with refunds of prepaid amounts, which could harm our business.

We may not have in place adequate quality assurance procedures to ensure that we detect errors in our hardware, software and open-source components that we use in a timely manner, and we may have insufficient resources to efficiently address multiple service incidents happening simultaneously or in rapid succession. If we are unable to efficiently and cost-effectively fix errors or other problems that we identify and improve the quality of our solutions or systems, or if there are unidentified errors that allow persons to improperly access our services or systems, we could experience litigation, the need to issue credits to customers, loss of revenue and market share, damage to our reputation, diversion of management attention, increased expenses, reduced profitability and other negative consequences which could harm our business.

Defects in our security solutions or human error could lead to negative publicity, loss of business, damages payments to customers, diminishing customer appeal and other negative consequences which could harm our business. As our solutions are adopted by an increasing number of enterprises and governments, it is possible that the adversaries behind advanced malicious actions will specifically focus on finding ways to defeat our products and services. If they are successful, we could experience a serious impact on our reputation and financial condition as a provider of security solutions.

AKAMAI TECHNOLOGIES, INC.
CONSOLIDATED STATEMENTS OF INCOME

(in thousands, except per share data)	For the Years Ended December 31,		
	2024	2023	2022
